

Enabling **in-depth**
Enterprise Risk
Assessment and
Reporting

NEXUS-V™

Developed by Risk
Practitioners for Risk
Practitioners

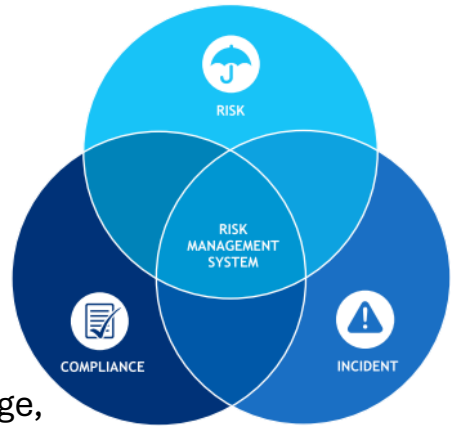

A lightweight software to reduce the effort and cost involved in risk assessment and management, through integration of ISO31000 and ISO22301 principles to organizational processes.

Step up to Nexus-V and free-up time, resources and efforts spent on Excel spreadsheets and increase the efficiency and comprehensiveness of the risk management processes.

Manage risks, issues, incident reporting and compliance into one single inter-linked process

Create a simplified view more risk focused culture

- Nexus-V enables organizations to establish a consistent risk language, risk categorization and risk assessment processes throughout the enterprise.
- Nexus-V empowers users to perform an objective-based or context-based risk events and provide greater assurance regarding the achievement of strategic and operational objectives.

Risk Management

Identify, track and manage risk with confidence. Build risk registers, conduct risk assessments and set controls & KRI's.

Incident Management

Report actual incidents and near misses, conduct investigations, determine impact, and monitor cases until closed.

Compliance

Set up an obligations library and ensure compliance with regulations, policies and procedures. Manage regulatory change.

Quick to implement

Be up and running in days or weeks not months

Improves the process

Robust and systematic approach delivers process efficiencies

Frees up valuable time

Save time on spreadsheets or legacy system workarounds
